

ABOUT JUNE JUST

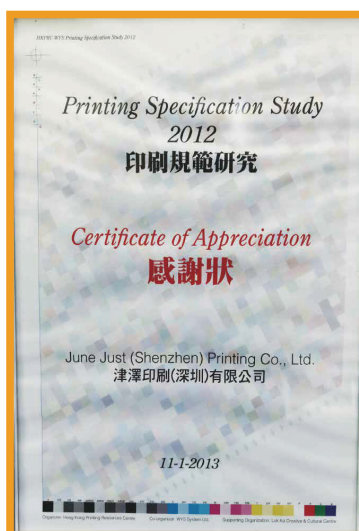

Basic information

80s and has been dedicating to labels and packaging printing. After years of endeavor and constantly upgrade our equipments and management systems, we have transformed from traditional printing to plastic-film and specialized printing, as well as innovative products development. Essentially, "Satisfying clients with the best quality" is always our fundamental objective. Our factory located in Southern China since 1993. In views of the advantage of the geographic location and advanced machineries and facilities, majority of our products are exported to the American & European markets which result in an exceptional growth in business. In 2011, we renamed our factory in China to "June Just Printing (Shenzhen) Co., Ltd." in order to identify ourselves as an international enterprise. We reached the next level in our operation systems and management, which benefits us in a better business development in the domestic market. Besides our excellent management team and operation system, the ERP system, implementation of 6S management system and verification from global and international standards. These give us a promising foundation to provide quality service to every client.

The company covers an area of 20000 square meters and a building area of 11000 square meters.

Certificate of honor

PRODUCTION PROCESS

PRODUCTION PROCESS

We have numbers of advanced printing machines such as 2 to 6 colour printing machines for different production lines, to cope with different demand on wide varieties such as paper, card, holographic film, lenticular card and kinds of non-standard special materials.

Other additional steps for backup stage of production, i.e. added value, special effect, oil lamination, glossy lamination, UV & epoxy coating, neon effect, surface matting, transparent coating, glitter, tipping, hot-stamping, depositing, die-cut molding, emboss, off-set, adhesive, UV and screen-printing, stitching binding package and delivery services, etc.

Mature craftsmanship: We have mature craftsmanship and printing techniques such as 6 color UV printed on soft PVG, gold & silver foil cards, holographic paper, yupo paper 3D lenticular, hydro & heat transfer thermal, UV & glow, glittering powder, hybrid printing, handicraft box and stylish hanging bags are our expertise as well.

Green Printing: Early on, we have been complying with international standard on environmental protection. We insist on using soybean inks and reusable materials, lowering carbon emissions and reducing energy and wastage.

Brands Design

June Just has been proudly manufacturing the packaging and products of some renown brand names such as: Disney, Apple, iPhone, Coca Cola, ESPRIT, Windows®, etc. Our sound production procedures and quality have been affirmed around the world, including Europe, Japan, China and other emerging markets. We will not only continue to serve our existing clients with satisfaction, but also to develop our in-house brands and products. In the mean time, more resources including employee trainings, software/hardware update will be undertaken so as to meet the challenge of developing innovative products.

Strategic cooperation

PATENT APPLICATION

3D printing 3D patent

Environmental protection ink proportion control patent

Paperless printing template design patent

Analog display system patent

R&D and prepress

6 engineers and 10 technicians

Internal product laboratory

8 quality management personnel

It is equipped with high and low temperature detection, simulated transportation detection, product bursting force detection, small items, tension and torsion detection equipment.

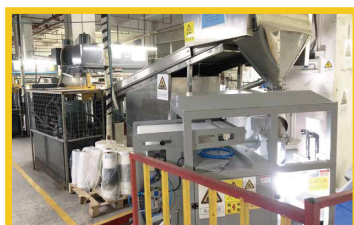

Printing workshop

10 printing machines of different types

Production workshop

20 automatic high-speed paper processing machines
6 assembly lines

Packaging workshop

3 assembly lines in packaging workshop
1 dust-free workshop assembly line
